Cotton bag with linoleum printing technique

Instructions No. 1340

Difficulty: Beginner

Discover the fascination **Linoleum print:**
Make your own printing plate, then simply transfer the design using copy paper, for example onto a cloth bag.

And it's as simple as that:

First iron the cotton bag and transfer the motif template using copy paper to a Linoleum printing plate.
Now everything that does not belong to the motif is carved away on the linoleum printing plate. Apply linoleum ink to the roller. Use an ink roller for this

Print or stamp the still wet ink on the bag and wash the ink off immediately from Linoleum printing plate . The ink is then immediately ready for the next stamp print.

Extra tip:
We recommend that you start with the Linol Cutting Set. This contains besides different knives and a first tube of linoleum ink, ink roller,Linoleum printing plate and ink palette a detailed instruction about the hobby Linoleum print.
