Übertöpfe mit Ceramic-Mosaik

Instructions No. 154

Your little "herb garden" simply made by yourself. In Mediterranean style, the pots are twice as good. They are not only a real eye-catcher on the windowsill or in the garden, but always offer you fresh herbs for your cooking creations.

Mosaic on cachepots

For the cachepots, glue the various mosaics onto the pots with assembly adhesive or silicone glue. Start with the Crackle mosaic. For this you take the silicone glue. Combine the different stone sizes of the ceramic mosaic with each other and fix them with mounting glue.

When the mounting adhesive is dry, mix Joint Filler according to the manufacturer's instructions, stirring Joint Filler into the water.

Spread the Joint Filler on the mosaic and work it in with a brush.

After about 30 minutes, carefully wipe off the excess Joint Filler . Leave to dry overnight and wipe again the next day until the mosaic shines a bit.

Now paint the upper edge with Hobby-Color in grey.

Now only fix the Jute yarn with hot glue to the pots and that's it!

This idea is timelessly beautiful!
