

Anleitung: Süße Holzspulen- Wichtel

Instructions No. 735

Little cute gnomes can be made very quickly from wooden spools and Wooden balls, Jute ribbon and small decorative accessories. Together with a decorated willow wreath they are a particularly decorative eye-catcher!

And it's as simple as that:

First of all the **gnomes** are made:

For the small Deco figures wooden spools, Jute yarn and decoration accessories are needed. In the decoration example we used design-Felt, matching buttons and ribbon. With a fabric scissors thin strips of Design Felt are cut to size. These are wound together with the Jute yarn on the wooden spools and fixed with hot glue. The Yarn- or felt strip end, for example, can be hidden under a glued-on button. They form the body of the gnomes. Then the Wooden ball is glued as a head to the Spool. For the pointed cap, simply cut a triangle from design-Felt, form it into a pointed cap and glue the ends together. With cap, bow tie as neck ruff and Jute ribbon the gnomes are finally "dressed" and decorated.

The **willow wreath** is first wrapped with jute cords, Felt ribbon or other suitable Decorative ribbons and then

pasted with paper flowers: For this purpose, flowers are punched out of suitable handicraft paper and made with a button as a flower center

Arrange gnomes and willow wreath together - ready is the eye-catcher!
