Branding Tray

Instructions No. 2634

Difficulty: Advanced

Working time: 4 Hours 20 Minutes

In the wintertime, people get cosy indoors in the cold weather. Of course, you can't miss biscuits and other treats. You can serve them in style with our great **homemade tray**. The **branding** also makes the tray an eye-catcher.

This is how the tray is designed:

Print out the **template** and transfer it to the **wooden plate** with carbon paper. Now burn in the motifs and the lettering with a **branding pen**.

After firing, varnish the plate with **acrylic varnish**. After the varnish has dried, outline the words "Cookies" and "Santa" with the markers. Posca markers are best for this.

Now fix the **handles** to the plate with small nails. We placed them with the following distances: top and bottom 3 cm, sides approx. 0.5 cm.

Finally, **tape** the edges of the plate.

Article information:

Article number	Article name	Qty
662178	Glued wood panel spruce/Fir	1
