Candle with napkin technique

Instructions No. 2475

Difficulty: Beginner

Working time: 2 Hours

The napkin technique is incredibly creative and versatile. Not only surfaces like wood, papier-mâché and terracotta can be designed with napkins. You can also decorate candles to your heart's content with various napkin motifs. This turns plain candles into true decorative highlights for your home.

Napkin technique on candles

1. Remove the unprinted layers of the napkin.

2. Either use the napkin as a whole or cut out individual motifs.

3. using a napkin brush, gradually apply the candle potch to the candle and place the napkin on top. Allow the potch to dry briefly and then coat the top of the candle with the candle potch. This will ensure that the edges of the napkin stick securely.

4. The finished candle can easily be placed on a glass coaster or in a lantern.
