

Casting soaps and packaging them beautifully

Instructions No. 2884

Difficulty: Beginner 🍴🍴🍴🍴

Working time: 2 Hours

Self-poured soaps are an excellent gift idea for birthdays, Christmas or just as a little present. Packaged in beautifully decorated cream tins, the nourishing soaps really make a statement.

Lavender soap

Melt approx. 60 g of organic cast soap in a melting pot or alternatively in a melting ladle over a water bath. Add a little lavender soap colour, lavender fragrance oil, argan skin care oil and cosmetic emulsifier to the mixture. Stir well and pour into the silicone mould.

Green soaps

For the green soaps, melt approx. 120 g of organic cast soap. Add perfume oil hay and sandalwood, soap colour olive green, skin care argan oil and cosmetic emulsifier to the melted mass. Tip: Fill only one mould. Add a few drops of soap colour to the rest of the mixture and stir well. This way you will get two different shades of green.

After about 4-5 hours, carefully remove the finished soaps from the mould.
