Christmas candles with napkin technique

Instructions No. 2586

Difficulty: Advanced

Working time: 1 hour 30 Minutes

Create your own **candles**! With the help of our instructions, a great **napkin motif** and the candle liner, you can create unique candles with a high-quality look.

This is how the great candles are designed:

Cut out the desired motif from the **napkin** and peel off the top printed layer. In our example, we have chosen a cute elf.

Place the motif on the candle surface, stretch baking paper tightly over it and carefully heat the motif with the **embossing dryer**. As soon as you see that the wax is liquefying on the surface, turn off the dryer. After a short moment, carefully peel off the baking paper. The motif has now "sunk" into the top layer of wax.

Stamp the smooth side of the **tissue paper** and trace the word "Christmas" from the template with a coloured pencil. Cover both words with baking paper and apply to the candle in the same way as described above. Then trace the word "Christmas" with the **candle liner**. Place the decorated candles on the coasters and you have a great Christmas decoration.
