Christmas motif templates for your Silhouette Cameo

Instructions No. 1676

Difficulty: Advanced

Working time: 10 Minutes

We love to create perfect craft designs with the **Silhouette Cameo** plotter. We have created unique motif templates for you, which you can easily download as a file and transfer to the plotter machine.

Motif template especially for your Silhouette Cameo

The filigree house front of the lantern and the pop-up map were both created using the plotter machine. Download the design template for both ideas. It is saved in a file format compatible with the Silhouette Cameo. It can be loaded into the machine immediately and without any problems.

For the Wind light we punched the front of the house out of blue Coloured paper , then positioned the motif on an Lamp foil , placed it around a tea light and cut it to size accordingly.

The pop up card with the Christmas tree was created from a messenger Kraft paper . For this purpose the Christmas tree motif is loaded into the plotter. In the machine the motive is marked. In the drop down menu "Areas" of the plotter the tab "Pop Up" is selected. This takes you to the settings for creating a pop-up map

The Kraft paper is placed on the cutting mat, this is pushed into the machine, now you can "plot".
