

Clock made from craft blocks

Instructions No. 3096

Difficulty: Beginner 🍴🍴🍴🍴

Working time: 2 Hours

A **clock** is always a nice practical decoration in your own four walls. Our clock made from **craft blocks** is one of a kind! It can be customised as desired and is always an eye-catcher. The plate made of craft blocks, as well as the numbers, the hands and the design with colours offer many opportunities for individual expression.

This is how you design the clock:

First, take 6 craft blocks, place them in front of you and glue them together to form a panel using VBS handicraft glue. Put them to one side to dry.

Attach 4 opposite markings to the metal ring where the times 12:00, 3:00, 6:00 and 9:00 will later be. To do this, attach the beginning of the cotton cord to the metal ring with a little glue. Leave it to dry briefly. Then wrap approx. 2 cm of cord around the ring and glue the end down again. Repeat this on the other markings.

Now take the wooden surface with the glued-together **craft blocks**. Measure the centre with a ruler, mark this point with a pencil and drill an 8 mm hole for the clockwork.

Place the **metal ring** in the centre of the wood. Mark the contact points of the metal ring to the right and left of the cotton cord at 12.00 and 6.00 and drill two small holes (approx. 3 mm) in each. Take a piece of cotton cord, thread it through the drilled holes using a darning needle and use it to knot the metal ring to the wood.

Plug the lace from the **clockwork** through the wood from behind and turn the whole thing round. Assemble the clock with the washers and hands according to the instructions on the pack.

Finally, glue the **wooden numbers** on with handicraft glue.

Must Have

[VBS Handicraft blocks, Ash wood](#)
