DIY friendship bracelets

Instructions No. 2407

Difficulty: Beginner

Working time: 2 Hours

Friendship bracelets are becoming more and more popular these days as a way to bind each other's friendship. In this tutorial we will show you how to quickly weave or knot your own friendship bracelet.

First you take the bead weaving frame with which you have to cover the warp yarn.

Then take the embroidery twist of your choice, which you can best pull through a needle. Now you can start weaving. Here you are free to choose which colours or which pattern you want to use.

Another way to make friendship bracelets besides the bead weaving frame is to knot them in the traditional way. There are different approaches to get different patterns. For the knotted friendship bracelets you can of course also incorporate different beads. This makes the friendship bracelets as individual as your friendship.

Finally, knot the ends so that the embroidery twist and your friendship ribbon don't come loose later. Now all you have to do is cut the appropriate warp yarn, tie it together with a piece of warp yarn and glue it into the fasteners with the craft glue.

Must Have

Bead weaving frame

Number of parts: 13
Length: 34 cm
Width: 11.5 cm
Material: Beech wood

9,95 €
