Embroidered Christmas cards

Instructions No. 3551

Difficulty: Beginner

Working time: 1 hour

With our instructions, you can conjure up exceptionally beautiful christmas cards, in just a few steps, which impress with their hand-embroidered details. Learn how to create them using stamps and needle and thread.

Use watercolour paper for your personalized greeting cards. Start by cutting the Paper with the VBS Contour cutter to the desired greeting card size. This Paper is not only known for its ideal texture for painting, but also provides an excellent base for embroidery.

Print out our free template and transfer it to the watercolour paper using graphite paper or design your own motif.

Finish the Paper first with VBS Silicone stamps and a waterproof StazOn ink pads. The stamping ink dries quickly and does not run when painted. Then pick up your favorite inks and breathe colorful life into your motifs. Let the paint dry thoroughly before you start embroidering.

Now comes the heart of your card - the embroidery! Take embroidery twist (also known as embroidery yarn) and a needle. Embroider the contours of the motifs. For additional accents, you can work with sparkling Rocaille beads that you thread onto the yarn .

Attach 3-D glue pads. to the back of the watercolor paper for a raised effect and to give your card that little bit extra. Stick the watercolour paper onto a double card - and marvel at your unique result!

From us to you: Embroidery on Paper opens up endless creative possibilities! With our high-quality materials, you can design beautiful cards and enjoy the beauty of the hand-embroidered details. Visit our online store and start your new creative embroidery project today!
