## Embroidery ring as lantern

**Instructions No. 2370** 

Difficulty: Beginner

Working time: 45 Minutes

A different kind of **embroidery ring** - these **lanterns** are super simple and can be made with very little material. The finished lanterns give off a beautiful light and are also perfect as a gift. The lanterns made from embroidery rings are great to make and can always be decorated according to the season.

## This is how you create the beautiful lanterns:

- 1. First cut the **tracing paper** to the size you need. To determine the circumference, it is best to place the tracing paper overlapping the desired size of your **embroidery ring**. Mark the required length plus a glue margin.
- 2. Cut out the desired **scratch stickers** from the sheet and decorate the tracing paper in the desired places. Then peel off the backing film and rub the sticker onto the paper using the wooden stick provided.
- 3. Now stick the transparent paper together to form a ring and place it in the ring.
- 4. With an **LED tea light** or a **string of lights**, your lanterns will now shine beautifully and give off a cosy light.
