Funny Purple Bats

Instructions No. 677

For Halloween at the time of the creepy characters or for the creepy party the ghosts rattle their chains. The purple bats are an absolute must, so you better start tinkering right away!

And this is how it works

First you paint the balls and the hearts purple. When the paint is dry, stick the two parts together with a toothpick and cover the transition with Chenille wire.

Now use the template to cut one Stencil for ears and wings, transfer the outline to the black one and cut Felt it out. For the legs you twist three chenille wires and cut them in the middle. For the arms twist two chenille wires and glue them with hot glue across the felt wings. Prick a small hole in the edge of the wings with the scissors, put one of the two chenille wires through and twist it with the other one. This way the wings stay taut and don't slip together in the middle. The rest from Chenille wire you just cut off.

Now it's the legs' turn. To do this, prick small holes in the bottom of the hearts with scissors and glue the legs with hot glue. Do the same with the ears on the Polystyrene-ball. Finally, you press the cat's eyes into the purple ball head and paint with black Pearl-Pen and whiten the Handicraft paint face.
