Glowing wooden stars

Instructions No. 1687

Difficulty: Beginner

This Christmas DIY light is made within a short time. The decorative stars certainly fit into every home.

Craft idea for impatient people

First use the outer contours of the wooden stars as a template to **cut** the star foil. Cut the Lace of the foil stars, remove narrow triangles. Place the film in the stars and use a folding leg or scissors to draw a seam in the film. Before gluing it in, prime the wooden stars with **VBS Chalky Color paint** in antique green and Stone Grey.

After drying, the star foil is glued in with double-sided Adhesive tape , into the inside of each star a **Fairy lights** fixed. Arrange the stars together with some fir green and Christmas Balls in your home.

Must Have

VBS Wooden stars "Frame"

Motif size: 18 - 29 cm
