Illuminated winter scene in the frame

Instructions No. 2369

Difficulty: Beginner

Working time: 3 Hours

This beautiful **self-designed decorative frame** brings Christmas spirit into your home! The snowman with the snow-covered mountain peaks is not only an eye-catcher in the light. In the dark, the **built-in LED light chain** makes the great winter motif glow and gives the mountain landscape a beautiful depth.

This is how you design the frame:

First, spread **decorative snow** in the **frame**. Place the **figures** in the wet snow so that you do not have to glue them on. Allow to dry well.

Download the **templates** and then transfer them to kraft paper. Cut out the mountains and add decorative snow to the tops. Attach the fairy lights behind the cardboard with craft glue.

Then glue the landscape on top of each other with **3-D adhesive pads**. Attach a blue cardboard to the back of the frame and then fix the landscape to it with the adhesive pads.

Decorate the scattered **stars** on the blue background and on the mountains as you wish.

Remove a small corner from the back of the frame with the cutter knife. Pull the cable of the fairy lights through there. Then fix the back panel in the frame. Glue the battery compartment of the light chain to the back wall from the outside.

Must Have

Decorative frame, approx. 21,5 x 16,5 x 4 cm

Length: 16.5 cm
Width: 4 cm
Height: 21.5 cm
Material: Wood, Plastic

7,95 €
