Instructions: Decorative hearts with granite-paint

Instructions No. 637

Effect colours - An interesting and easy way to set special accents

With the **VBS Granite-colour** you achieve a great Stone-look. Ideal for the design of wood Stretched Canvas, cardboard, metal and like here on Polystyrene hearts.

Here's how it's done:

First enter a **Spatula** the **Granitecolour** is Terracotta applied to the large polystyrene heart**.** Now draw a pattern with a wooden stick or a drawing tool as desired into the applied paint and let it dry thoroughly.
Quartz Repaint the carved pattern with Granite-paint. For painting use the drawing tool or a Bristle brushes.

Colorize the small polystyrene heart in the same way, but use color in Granite-and color out for Quartz the area and pattern color. The colour contrast between the two hearts gives the pair of hearts a special optical effect.
