Key board made from craft blocks

Instructions No. 2965

Difficulty: Beginner

Working time: 3 Hours

Craft blocks are extremely versatile and can be used creatively. Discover here how you can use the small blocks to make a storage board with a key hook and post box.

First glue 7 craft blocks together on the long, narrow sides to form a square. Make 5 more squares in this way and then glue all 6 squares together to form a flat wooden board. Now leave everything to dry. The back wall of the key board is now finished.

Use glue to make storage shelves for your key board from 3 or more craft blocks. Now you can decorate all the parts with paint and stencils.

This is how stenciling works particularly well:

Apply spray adhesive to the painting stencil and then position it on the board. Pick up some paint with a dry dabbing brush and carefully dab it through the motif on your painting stencil. As soon as you have dabbed on the paint, remove the stencil and clean it immediately with water.

Hanging up

To hang up the key board later, first attach picture eyelets to the back of the key board. Then tie a ribbon to the eyelets.

Attach the storage compartments

Now glue the storage compartments you have made to the back of the key board. Attach these to game pieces: at the same time to make great knobs on which the keys can be hung later.

Must Have

VBS Handicraft blocks, Beech wood

Content: 117 pieces
Length: 160 mm
Width: 22 mm
Thickness: 8 mm
Material: Beech wood

15,99 €
