Lamp with Alcohol Ink

Instructions No. 2017

Difficulty: Advanced

Working time: 3 Hours

Atmospheric light in the dark season always makes a good impression and brings a beautiful ambience into your home. With the great **alcohol ink technique** you conjure great effects and your lantern becomes a shining highlight.

That's how you make this great lamp:

Place the **template** under the **Lamp foil** and tape the sternal outlines with masking tape. You can vary and arrange the star sizes as you wish

Design the inside of the stars with **Alcohol Ink** and **Extender** and work on it with the bellows.-Adhesive tape Remove the crepe. If some paint has Adhesive tape run under it, put some extender on a paper towel or cotton swabs and remove the excess paint

For a "marble effect" between the stars, design the areas with lots of extender and little colour (black). Also work with the bellows

Lamp foil fasten to the lampshade rings with hot glue

Cut off approx. 65 cm from the **taffeta tape** twice and apply two strips of double-sided tape over the entire length Adhesive tape

Place the decorative Washi Tape around the top and bottom of the edge to conceal and border it

The last step only is to attach the **connection cable**.
