

LED Sternteelicht-Gesteck

Instructions No. 913

This small, sophisticated Advent arrangement promises the greatest possible safety through the tea light in LED technology. Decorated with scattered stars and festive shiny accents, this star can be optimally used as an independent, small Advent arrangement or gives your festive table a special ambience.

And it is as simple as that:

Prime the stars in white and let them dry well.

Use the side cutter to cut off fir branches that you can stick to the underside of the star. Outline the contours of the tea light with the Gold Pearl Pen. Then decorate your arrangement with the flower-hair and the strewing stars in the fir branches and stick the Cord on the edge of the wooden star. Now place the LED tea light in the middle of the star.
