Lip peeling

Instructions No. 2764

Difficulty: Beginner

Working time: 1 hour

A **lip peeling** makes the lips rosy and supple, as it gently removes dead skin cells and stimulates blood circulation. A great gift for yourself or as a **gift idea**. With the fragrance oil and the colour, you can change the lip care at will and adapt it to your needs. The coconut oil is moisturising and skin caring and just right for sensitive lip skin.

This is how you make the lip scrub:

Ingredients:

Coconut oil, amount to taste

Soap colour

Fragrance oil

Sugar

Stir the **coconut oil** in the mixing bowl until creamy. Then add the **soap colour, fragrance oil and sugar** as desired.

Stir well. Pour the finished mixture into the containers.

First prime the **chipboard box** white so that the colours of the Décopatch paper come out beautifully. Apply Patch Adhesive to the desired area. Place the paper on the surface and coat the paper with another layer of glue.

Write the desired lettering on a piece of paper or cardboard and glue it to the edge of the lid. We have chosen "Strawberry Kiss" as we have added **strawberry scented oil** to the lip care. Of course, you can also use congratulations, sayings and much more here. Finally, decorate the tin with the paper flowers.

Application:

Apply the lip scrub and rub it in gently. After a short exposure time, the peeling is rinsed off and you can best apply a moisturiser to the lips.
