

Marmorieren mit Crazy-Colour

Instructions No. 270

These beautifully marbled balls ceramic balls were designed with the unique " Colour for marbling Crazy-Colour" This Colour for marbling forms completely different structures on different carrier liquids. You can use almost everything that is available in a normal household, e.g. water, tea, milk, detergent, etc. In addition, you can change the effect by dripping it on a Colour for marbling moving surface or waiting for it to calm down. The individual colours also react differently, e.g. blue crazy colour on milk produces a different pattern than green crazy colour on milk. The possibilities are extremely diverse.
