Metal ring with tassels

Instructions No. 1951

Difficulty: Beginner

Working time: 1 hour

The Macramé-technique can be used to knot beautiful patterns. We combined the Macramé-artwork with stylish metal rings and conjured up an impressive decoration.

At first the **Wooden balls** painted with **VBS Handicraft paint inApricot**. Use the **Clover tassel winder** and the enclosed instructions to wrap different coloured **tassels** with **Embroidery twist**. At the top of the finished tassels there are small lateral holes, there **Embroidery twist** pulled through, knotted and then one of the **Wooden balls** raised. The finished tassels with balls are then knotted to the **metal ring**. To connect the big and small metal ring, make a tassel **with** three again**, Wooden balls**wrap the remaining thread several times around both rings and make a tight knot

A string **tiedMacramé** with the -technique serves as a **suspension**. Use the **free template** for help and follow the procedure described below. Cut **two approx. 100 cm** long **Embroidery twist Close the cords,** take both threads together in the middle and put them around both metal rings as a loop on top. To tighten, pull all threads through the loop. Now you should have four cords which are **knotted** with the reef knot

Anchor stitch (start knot)

Cut **16 x approx. 80 cm** long **sEmbroidery twisttrings,** take both strings together in the middle and put them around the metal ring from the front as a loop. Afterwards the loose ends are led over the metal ring **through** this loop. Then tighten well.

Square knot

Take the **free template** for help. You should now **have** 8 **loops with** 4 threads each**,** which are now knotted. For this you take from one loop the **left lying string and** lead it over **the two** middle strings to the right. The **right string** is led **under** the middle strings to the **left**. In the next step, the **left line** is led **under the** center cords to the **right** and the right line **over the center cords** to the left. Tighten well. You can now continue with this knot until you are satisfied with your result and a nice pattern is created. Finally the ends are simply **knotted** to the large metal ring.
