Miniature winter scene with market stall

Instructions No. 3507

Difficulty: Beginner

Working time: 5 Hours

Create your own winter wonderland and design a magical miniature snowy landscape with a Christmas market. With simple materials and a little patience, you can create a captivating decorative piece in just a few steps that will brighten up any living space. With the help of these instructions, you can quickly recreate the illustrated decoration idea.

1. **Stable surface made from wooden blocks as a base**

Start by gluing wooden blocks together using handicraft glue to create a stable base for your winter landscape. Glue together as many blocks as you like; we recommend a surface of 3 blocks long and 13 blocks wide. To do this, glue three rows of 13 craft blocks together along the long edge. Then glue the three "rows" that you have created together vertically to create a rectangular surface. Leave the surface to dry completely. It will then be stable

enough to serve as the base for your miniature installation.

2. **Lighting for the metal star**
Carefully wrap the chain of light around the metal star. Use hot glue to fix the star securely between two upright blocks. Make sure it is firmly attached so that the decoration remains stable.

3. **Painting the market stall**
The VBS wood building kit "Market stall" consists of individual wooden parts. Paint these parts according to your personal taste with VBS handicraft paint. As soon as the paint is completely dry, assemble the miniature stall with the help of VBS handicraft glue together.

4. **Creating a snowy landscape & placing miniatures**
In the next step, use the plastic spatula to evenly distribute the VBS Decorative snow and also VBS Decorative snow glitter on your wooden block plate to create a lively look.

Then, while the snow is still wet, place the miniature fir trees, the miniature beer table set, the lanterns, snowmen, the miniature winter set and the star in the layer of snow. These accessories will be glued in place as soon as the decorative snow has dried.

Therefore, make sure that you do not cover the battery compartment of the chain of light with the decorative snow so that it remains accessible. Once everything is completely dry, insert the market stall into the snowy landscape.

Get started now!

Create your own personal miniature Christmas or winter landscape now. Visit our online store and get all the materials you need right away. And look forward to some fun crafting time and a magical new decoration that will give your home an atmosphere full of winter magic!

Must Have
