

Nähanleitung: Utensilien-Körbchen

Instructions No. 1241

And it's that easy

First, cut 4 **pieces of fabric** according to the template. Afterwards you clean up the edges of the Fabric cuts with the zigzag stitch. Now place a part of the outer fabric and a part of the **lining fabric** right sides together and topstitch the long, straight side with the straight stitch

Repeat this with the other **parts of the fabric**. Sewed together like this, first iron the unfolded sections and then lay them spread out right sides together. (Make sure that the lining and lining fabric are on top of each other as well as the two outer fabrics). The long edges created in this way are sewn together again with the help of the straight stitch, thus avoiding a turning opening. Now sew the bottom edges together

Now start **sewing the corners**. To do this, pull the open edges apart and place them on top of each other to form a straight line. Now sew this straight line together with the straight stitch. Next, turn your Organizer through the recessed turning opening and close it with the straight stitch. Depending on your taste, the edge can now be provided with an additional decorative seam. Then turn the edge over - finished!

Tip: If you use Cotton fabric instead of wax as lining, we recommend the additional reinforcement with Vliesline
