Nativity scene with craft blocks and castings

Instructions No. 2901

Difficulty: Beginner

Working time: 1 hour

Our self-made **christmas crib** is puristically beautiful and is a highlight for young and old. With the **handicraft blocks**, the stand for the christmas crib can be created entirely according to your own ideas. The christmas crib and the accompanying people and animals are self-cast and can be kept plain white or coloured and decorated as desired.

This is how you create the nativity scene:

Mix the **Raysin** powder with water according to the instructions to create a creamy mixture. Then pour the mixture into the molds. You can usually demold the **casts** after approx. 30 minutes. Then leave them to air dry for another 45 minutes.

In the meantime, you can glue the **wooden blocks** together with **handicraft glue** glue them together as desired. If necessary, you can also saw the wooden blocks shorter. In our example, we have shortened the two blocks for the wall.

Finally, use hot glue to glue the dried casting pieces to the wooden block plate. If desired, the castings can also be colored. Line the area for the animals with some **wood wool** out.
