Pearl dragonflies

Instructions No. 336

Summer pearl animals glitter in the sunshine and are quickly made!

It's as simple as that:

Hold the star shape with your hand. This consists of 8 wire strands. First, bend a first strand backwards in the middle using the jewellery pliers. This will create a hook for the later hanging

Feelers: The next right and left strands of the star shape serve as feelers. Depending on your taste, a row of pearls is threaded onto each strand. The end of the wire is then bent into an eyelet. The feelers can now be bent into shape

From four further strands, two on the right and two on the left, the **wings are formed.** First, beads are threaded onto the first strand on the right and left and an eyelet is bent at the end. Then provide the second strands with beads, put the end through the eyelet of the first strand and connect it with an eyelet. Bend the two connected wires apart and form them

Form the last wire with big and small beads to the **body** and secure it with an eyelet.

Must Have

VBS Wire forms "Star", Ø 5 cm

Content: 3 pieces
Diameter (outside): 5 cm
Thickness: 0.8 mm
Material: Metal

1,59 €
