Plotting butterflies

Instructions No. 2146

Difficulty: Beginner

Working time: 45 Minutes

Butterflies are such delicate creatures and flutter beautifully from flower to flower. Bring these delicate winged creatures into your home. We provide you with a **free file** that you can use to transfer the butterflies to the **plotter machine**. This cuts out the filigree motifs perfectly.
The butterflies are beautiful arranged as a plug, as well as a small decorative element on a card or gift packaging.

This is how you make the beautiful butterflies:

Open the file in **Silhouette Studio**. If you want to plot the **butterflies** in different colours, you must copy the butterflies onto a new page. Make the desired settings and plot the butterflies.

If you do not have a plotting machine available, you can alternatively print out the butterflies as a pdf and cut them out with a scalpel.

Glue the two butterflies together in the centre. If you want to make beautiful plugs out of the butterflies, poke a hole in the centre of the butterfly body with the awl and stick the plug wire through it. Fix a bead to the top and bottom with craft glue as a nice finishing touch.

Must Have

Silhouette Cameo 5

Length: 56.6 cm
Width: 17.6 cm
Height: 12.4 cm
Material: Plastic

349,00 €
