Polar animals from light bulbs

Instructions No. 2317

Difficulty: Beginner

Working time: 5 Hours

Our cute polar animals welcome you in the cold. The penguin, polar bear, snow bunny and seal are made of light bulbs that have been painted with craft colours. Arms, legs, ears and fins were formed from modelling clay. A great craft idea for young and old.

It's as simple as this:

1. First paint the light bulbs with craft paint. For a strong colour result, it is advisable to apply another layer of paint after the first one has dried.

2. Paint the faces of the polar animals with craft paint. Allow to dry.

3. Using wePAM modelling clay to model the body parts such as the seal's ears, fins, face, beak, legs and arms directly onto the light bulbs. If necessary, take modelling tools to help. For the grey modelling clay, you can simply mix black and white together and knead well.

4. After the modelling clay has dried completely, the parts can be fixed to the light bulbs with craft glue if they have not held on by themselves.

Must Have

VBS Light bulbs, 6 pieces

Content: 6 pieces
Diameter (outside): 5.5 cm
Height: 11.5 cm
Material: Glass, Metal

12,99 €
