Pouring picture

Instructions No. 2131

Difficulty: Advanced

Working time: 4 Hours

Are you still looking for a nice picture for your home? We have just the right thing for you! With the great effect of the **pouring colours** in combination with the **plastic flower arrangements** on the stretcher frame, the picture is an eye-catcher.

This is how the picture is designed:

First of all, prime your **stretcher frame** with craft colour light blue. Now mix the **acrylic colours** and the **metallic effect pouring** separately with **Pouring Medium** and silicone oil according to the package instructions. Stack the mixed colours in another cup and apply them to the stretcher according to your wishes. The cells will form by themselves. With a Bunsen or kitchen burner you can create even more cells. Now let your work of art dry for 24 hours.

Spray the inside of the papier-mâché **cups** in gold and paint them on the outside with craft paint. Glue the cups onto the dry stretcher. Now decorate the cups with moss, eucalyptus and branches.
