Rainbow against corona

Instructions No. 1949

Difficulty: Beginner

In times of the Corona Virus everything is different and our children notice this especially. In these difficult days they make a sign and hang **rainbows on windows and doors.** These can be painted**, glued,** with **windows and Finger paint**painted directly on the pane - it doesn't matter how - the sign only counts. I am at home and can't meet my friends. For that I send you a sign. Other children can now see it as they walk by and can get away from it all by counting the rainbows. At the same time they know that there are many other children who, like themselves, stay at home and do everything possible to help us get through the crisis together.

You too can create a **Rainbow** for your windows or doors. Our Rainbow-download serves as a **template** for **painting** or **gluing**. Why not take your children for a walk in the neighbourhood and count the rainbows. You can also forward this template and idea to your friends and the children there will have a nice pastime in this difficult time. Together lonely is much nicer!

Under the hashtag **#regenbogengegencorona** you can admire many rainbows at Instagram - maybe you'll be there soon?!? Not only a nice **activity idea for the little ones, but** also nice for adults to admire the rainbow signs in the windows.
