Sew a baby hat

Instructions No. 2005

Difficulty: Advanced

Working time: 1 hour

Our **hat is** not cute only , but is also simply sewn and does not need much fabric. The hat is made of jersey and is perfect for summer days when it is a little bit fresher or you go to the sea. Since the baby hat is sewn quickly, you can sew the right hat for every outfit. The cap is suitable for a head circumference **of about** 40-43 cm. Also a great gift for expectant mums and dads or just for in between ;o)

This is how the hat is sewn:

Print out the **template** and cut it out. A seam allowance of 0.5 cm is already included. Now transfer the template in the fabric break to the fabric and cut it to size

Now fold the **fabric** right sides together in the fabric break and pin everything in place. Close the outer edges with a straight stitch and then trim the seam with a zigzag or overlock stitch. Of course, if you sew with an overlock machine, there is no need to clean up the edges. Unfold the hat and place the seams that have just been closed on top of each other. Tighten everything again and close the upper curves with a continuous seam. Clean them up again

Turn your hat around

Bind the lower edge of the cap with a zigzag stitch. Now you can turn the cap twice.
