Shell crown

Instructions No. 1805

Difficulty: Beginner

Working time: 1 hour

Whether for the theme party, for the next festival or as a surprise for mermaid fans - this maritime crown makes something special on every head. With large and small shells, some glitter and pearls, this hair ornament looks especially noble.

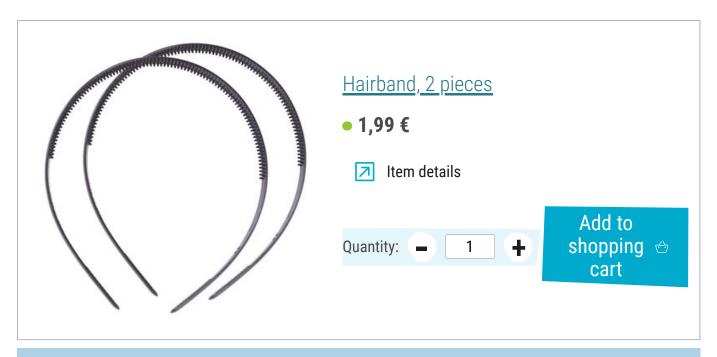

And so it goes:

In order to be able to work on the crown easily, it is recommended to adjust the hair band to a larger Polystyrene ball and then stick it onto a cup or Terracotta pot to put. Start now with small Polystyrene balls with a Polystyrene cutter to cut into slices. These form the basic structure for the shell crown. Glue the polystyrene slices to the hair band with a little hot glue. Now glue the mussels bit by bit to the Polystyrene balls hair band. You can easily fill up the spaces between them with the beads. Of course, you can also glue other decorative elements to the crown as you wish. Optionally you can spray the crown with some spray glue and sprinkle it with glitter

The mermaid theme doesn't suit you? Such a crown can be just as well combined with **artificial flowers**, plants or **Feathers** design. Likewise a hair band can be integrated into a carnival costume, e.g. as a feeler, for animal ears or as a crown.
