Stretcher frame with fir wreath

Instructions No. 2589

Difficulty: Advanced

Working time: 6 Hours

Decorate your wall for Christmas with this beautiful decoration idea of a stretcher frame and a fir wreath. The wall look with the wreath makes this look modern and contemporary.

Stretcher frame:
First mix the colours black and white to a medium grey and then prime the entire stretcher with it (using the paint roller). Now paint white rough bricks on the stretcher. For a 3D effect, shade them with the colour black. Lighten the centre of the joints with an almost dry brush (just a touch of light grey paint).

Wreath:
For the beautiful wreath, all you need to do is wrap the fairy lights around the wreath and attach the battery compartment to the back so that this is not visible. Next, take the double leaves from the eucalyptus branch and pull them from the stem and then spread and attach them accordingly on the wreath with hot glue. This is then done in the same way for the coconut stars and the baubles. For the ribbon, take a piece of any length (in our example approx. 50 cm). Pull it through the top of the wreath and staple it to the back of the stretcher. You can tie a bow from another piece of the ribbon and glue it onto the wreath.

Banner:
Transfer the existing template onto the kraft cardboard and design this with the pens. Finally, you only have to stick the banner onto the frame with the 3D adhesive pads.

Must Have

VBS Fir wreath "Pina"

Diameter (outside): 30 cm
Material: Plastic

14,99 €
