Styrofoam ring with flowers

Instructions No. 2148

Difficulty: Beginner

Working time: 3 Hours

A beautiful **wreath** welcomes guests and decorates the home in a very special way. You can create this charming wreath with very little material. Only a **styrofoam wreath** and **tissue paper** are used to make it and it can be crafted according to the season and your own colourful ideas.

Cut the **tissue paper** into small squares of approx. 3x3 cm and fold in the middle. Repeat and cut the upper open edge round to create four-petalled flowers and leaves.
Tip: Place several squares on top of each other to make the flowers and leaves more quickly.

Press the centre of the flowers and leaves into the **polystyrene ring** with the flat side of a bamboo skewer.

When the ring is filled, add a ribbon and hang it up.

Must Have

Polystyrene ring flat, (Roman), Ø 22 cm

Diameter (outside): 22 cm
Material: Polystyrene

1,19 €
