Styrofoam sea animals

Instructions No. 1786

Difficulty: Beginner

Working time: 1 hour

Welcome to our small underwater world. Our **sea dwellers** can easily do their own handicrafts and are still looking for a place in your home. How about this nautical decoration in the bathroom or as a playmate for your children?

Because jellyfish, cancer and co. are so easy to create, they can also be great for **children to make together**. Also a great idea for a child's birthday party - children's hands will be happy and busy with it.

This is how you make the cute animals:

You can start by **Polystyrene balls** with **VBS Handicraft paint** to paint. The colours can be painted very well with a **Paint sponge** apply. For opaque results you can apply a second coat of paint after the paint has dried. Let everything dry well.

From **Chenille wire** tentacles, legs, crab claws and fins are formed. These are then pressed into them Polystyrene balls with something Handicraft glue . These Wobbly eyes are also fixed Handicraft glue to the balls with something.

With the **Posca Marker**you can paint on mouths, eyebrows and also eyelashes. With the Posca Handicraft paint in the shade Corall cheeks and tongues can still be painted on.

Ready is your own little underwater world with many different sea creatures.

Quinn's jellyfish

Franzi Fish

Charles Cancer

Susi turtle
