Crafting technique: Glass scoring - tealight holders with engraved angel wings

Instructions No. 421

An old handicraft, which thanks to modern tools is now easy to learn even for the hobby artist - glass engraving turns simple everyday objects into valuable unique pieces. A hobby with many facets that anyone can learn - crystal clear! It Tealight holders is engraved with luxuriant wings, which are even more expressive due to the mirror mirror colour applied.

Instructions

Fix the template for the wings with crepe-Adhesive tape behind the glass and carve the contours with the fine diamond pencil. Then remove the template and attach black Coloured paper instead, so the fine lines are clearly visible. Now work out the areas with the middle diamond pin. For this, place fine lines close together and hatch the areas. Then smooth the hatchings with the grinding pencil so that an even shading is created. If necessary, tighten the edges again with the fine diamond pencil to create sharp contours.

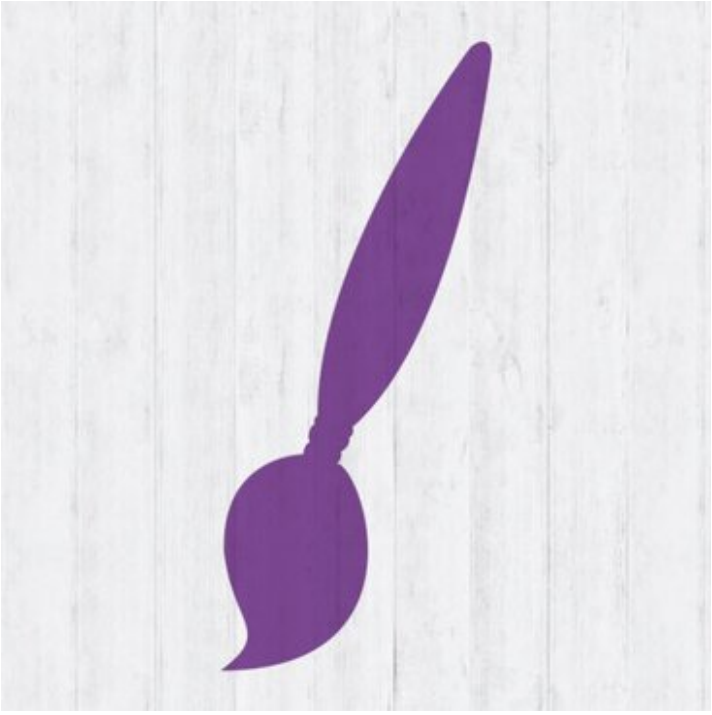

In between, wipe the glass surface repeatedly with a piece of soft cloth or a paper towel and clean from grinding dust.

Engrave the ornament in the same way. Start with the fine diamond pencil, deepen the lines with the middle diamond pencil and finish with the grinding pencil.

This idea is timelessly beautiful!
