VBS creative set "Egg warmer bunny", 6 pieces

Instructions No. 1404

Difficulty: Beginner

Working time: 30 Minutes

Warmed in a funny felt bunny, the breakfast egg is sure to taste especially good. With the help of these instructions **,** you can quickly design the bunny egg warmers yourself!

Here's how it's done

With the help of the **motif template**, the individual parts are cut out of Felt . For the rectangular body, the round lid and the bottom of the egg warmer use extra strong Felt, so that the egg can be kept especially warm later.

First glue the carcase together **at** the narrow edges, then fix the floor. The **ears** are made of brown skin-coloured Felt . Glue the smaller skin-coloured earpiece onto the brown rabbit ear. Now glue the spoons into the egg warmer.

Rabbit teeth and eyes from white Felt, and muzzle from skin-coloured Felt will be glued on next to form a face **.** Use small pieces of black Cotton cord as whiskers. Fix them together with a white pompon and two Wobbly eyes on the face.

The **arms** also consist of Cotton cord. Pierce the Felt-body with a leather needle, knot one end of the Cord each on

the inside of the egg warmer. Put a wooden bead on each and fix it with another knot on the Cord. Both arms are about 10 cm long.
