VBS Video crafting with leaf metal

Instructions No. 2324

Difficulty: Beginner

With leaf metal you can decorate simple objects with only little effort. What is important? What materials do you need? What is possible? This video is a great tutorial that answers these questions.

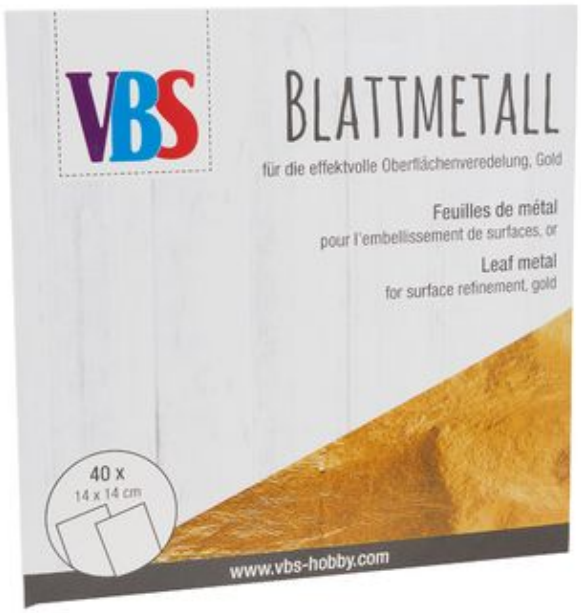

Worth knowing about leaf metal

leaf metal is also known as impact metal. The leaf metal foils and flakes in our range are made of copper and zinc and offer a great alternative to real gold leaf, which is used for traditional gilding.

With the help of gold leaf priming milk , leaf metal is drawn onto the surface of the object. The result is a great metallic look. Once the work is complete, any excess metal is simply brushed off. Incidentally, the excess leaf metal flakes are still suitable for processing. Our **tip**: work with a handicraft mat. This catches the excess flakes. Then simply store the flakes in a tin for the next leaf metal-idea.

Must Have

VBS Leaf metal, 40 sheets, Gold coloured

Content: 40 pieces
Length: 14 cm
Width: 14 cm
Material: Copper, Zinc

8,99 € (1 m2 = 11,47 €)
