Wall decoration driftwood-Christmas tree with baubles

Instructions No. 3110

Difficulty: Beginner

Working time: 2 Hours

This enchanting wall decoration will create a cozy glow in your home during the Christmas season. The simple natural wood look is combined here with black and white decorative elements to create a very elegant effect. Find out here how you can quickly recreate our idea.

First, wrap the chain of light around the individual pieces of wood of the driftwood-fir tree and fix them in place with a little hot glue. Glue the battery compartment into the top of the driftwood-fir tree using the hot glue gun. Make

sure that the batteries can be easily replaced later.

For the stars, you will need white and black craft cardboard sheet. Print out the template, cut out the stars and transfer them to the craft cardboard sheet. with a pencil Cut out the stars. You can use the craft punch-"Stars" to punch out more stars.

First glue the large white star to the top of the battery compartment so that it is hidden behind it. Then glue the other stars to the Christmas tree ladder according to your personal taste. This already has hooks. Hang the christmas balls and wooden pendants on them. Insert the batteries, hang up and switch on the light.

Enjoy the sight and the beautiful light of your new christmas decoration!
